thesper than any Roof of the old style, and we are sure it will give better satisfaction.

It will also be found to be the best thing ever invented to cover or mend old leaky tin, tar and gravel roofs, or around chimners, scattles, dormar windows, and gutters, shere the chimneys, scattles, dormar windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any object to which it is applied. The Roofs can be painted over (and warranted not to leak) at two d'liars and fifty centre per hondred square feet, which is cheaper and much better than paint. This Roofing will be found to be the best theng for covering large stoofs where they are exposed to fir—such as Bream Mills, Saw Mills, Factories, Railroad Cars, Bridges, Depots, Station Houses, Steambost Decks, and, in fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint in it, it presents no change for fire to dominunicate, and any in it, it presents no chance for the to communicate, and any light substance will burn out without ignition.

OFFICE BUCKETS STATE INSURANCE COMPANY, To all whom it may grackers. The is to certify that I have examined specimens and Roofs of W. E. Childs & Co.'s "Elastic Fire and Water Proof ament Roofing," and be lieve it to be eminently superior to any other kind of Roofing issue. I was an ere withers of a severe trial of one of these Roofs from a large volume of flame from an adjoining building, which struck directly upon the roof and corples for nearly half an hour. It should the trial beyond all expectation, and saves the building. T. M. HASKELL, President Buckeye State Insurance Co.

CINCINNATI AGENCY ROYAL INSURANCE COMPANY, } I have examined W. E. Childs & Co.'s "slastic Fire and Water Proof Coment Roofing," and as far as I can judge, consider it a great invention, and am willing to insure buildings thus protected upon the same terms as I insure those covered by metal.
